### Aviston Preschool Philosophy

A child's developmental growth is enhanced by the small step into the world of adults provided by an opportunity to touch, compare, sort, and manipulate "real things".

#### **The primary goals of Aviston Preschoolers are:**

1. To create and provide a positive climate for young children to grow socially, emotionally, physically, and intellectually.
2. To foster and help develop positive self-esteem and self-discipline in young children.
3. To initiate a program of learning experiences that are developmentally appropriate for children three and four years old.
4. To enhance children's language and literacy skills by providing an enriched library of books.
5. To develop an awareness of good nutrition and the importance of being and staying healthy.
6. To offer support for parents of children enrolled in the Preschool program.

#### **These goals are met through the following:**

**Role Play** - children love to pretend

**Active Play** – the children do activities such as running, jumping, climbing, and balancing

**Cognitive Play** – students use a variety of learning centers where they ask questions and observe what is going on around them

**Creative Play** – through art and music students are able to express their creativity
